

DESCRIPTION

OIL-IN-WATER EMULSIFIED COMPOSITION, AND EXTERNAL PREPARATION
FOR SKIN AND COSMETICS USING THE COMPOSITION

5

CROSS-REFERENCE TO THE RELATED APPLICATIONS

This is an application filed pursuant to 35 U.S.C. Section
111(a) with claiming the benefit of U.S. Provisional application
Serial No. 60/558,548 filed April 2, 2004, under the provision
10 of 35 U.S.C. Section 111(b), pursuant to 35 U.S.C. Section
119(e)(1).

TECHNICAL FIELD

The present invention relates to an oil-in-water
15 emulsified composition. Specifically, the present invention
relates to an oil-in-water emulsified composition comprising
lipopeptide compounds derived from microorganisms and xanthan
gum, which is excellent in feeling upon use, moisture retention,
emollient property and stability as well as environmental
20 suitability and safety for living organisms.

BACKGROUND ART

Oil-in-water emulsified compositions, providing fresh
feeling upon use, are being widely used in cosmetics, quasi-drugs
25 and the like.

Generally, emulsified products are unstable to heat, and
various methods for stably retaining the emulsified state are
known. Among them, a method of increasing viscosity of the
external phase is often employed. In case of oil-in-water
30 emulsified composition, natural water-soluble polymers such
as xanthan gum, locust bean gum, guar gum and carrageenan, and

synthetic water-soluble polymers such as polyvinylalcohol, polyvinylpyrrolidone, sodium polyacrylate, carboxyvinyl polymer, alkyl-modified carboxyvinyl polymer and copolymer of alkyl-modified acrylic acid/metahcrylic acid are used for the purpose of increasing the viscosity of the external phase.

As surfactants used in oil-in-water emulsified compositions, nonionic surfactants such as sorbitan fatty acid ester, polyoxyethylene sorbitan fatty acid ester and polyoxyethylene alkylether have been conventionally used.

However, with respect to emulsified compound used in external preparation for skin and cosmetics, due to increasing concern in not only safety and mildness for skin but also environmental suitability, it is required to use a material having as high safety for the living body and as high environmental suitability as possible, and reduction in usage of synthetic water-soluble polymers and nonionic surfactants which include petroleum in their starting materials is being demanded.

In order to solve these problems, various studies are being made on oil-in-water emulsified compositions using water-soluble polymers and surfactants derived from natural materials. External preparation for skin and cosmetics using lipopeptide compounds derived from microorganisms are disclosed, for example, in JP-A-2000-327591 (W099/62482), JP-A-2003-176211 (W003/013446), JP-A-2003-95853, JP-A-2003-12445, JP-A-2003-277220 and JP-A-2003-277250. However, in those techniques, there remain problems that emulsification is insufficient or that a stable emulsified product cannot be obtained.

DISCLOSURE OF THE INVENTION

An object of the present invention lies in provision of an oil-in-water emulsified composition which is excellent in feeling upon use, moisture retention, emollient property and stability as well as environmental suitability and safety for living organisms.

Another object of the present invention lies in provision of external preparations for skin and cosmetics using the oil-in-water emulsified composition.

As a result of intensive investigations to solve this problem, the present inventors have found that by using lipopeptide compounds derived from microorganisms and xanthan gum in combination, even without using synthetic water soluble polymer or nonionic surfactant, good emulsification can be attained to thereby obtain an oil-in-water emulsified composition which is excellent in feeling upon use, moisture retention, emollient property and stability as well as environmental suitability and safety for living organisms, and thus completed the present invention.

Accordingly, the invention relates to the following items.

1. An oil-in-water emulsified composition, which comprises 0.1 to 5 % by mass of (A) lipopeptide compound derived from a microorganism, 0.05 to 1.5 % by mass of (B) xanthan gum, (C) oil component and (D) water.

2. The oil-in-water emulsified composition according to the above item 1, wherein the content of the oil component is from 25 to 70 % by mass.

3. The oil-in-water emulsified composition according to the above item 1, wherein the water content is from 15 to 55 % by mass.

4. The oil-in-water emulsified composition according to the above item 1, wherein the microorganism-derived lipopeptide compound (A) is at least one species selected from surfactins, its analogous compounds and salts thereof.

5. The oil-in-water emulsified composition according to the above item 4, wherein the surfactin or its analogous compound comprises at least one or more compounds as represented by the formula (1) below:

10 (in the formula, X represents an amino acid residue selected from the group consisting of leucine, isoleucine, valine, glycine, serine, alanine, threonine, asparagine, glutamine, aspartic acid, glutamic acid, lysine, arginine, cysteine, methionine, phenylalanine, tyrosine, tryptophan, histidine, proline, 4-hydroxyproline and homoserine, and R represents a
 15 normal alkyl group having from 8 to 14 carbon atoms, an isoalkyl group having from 8 to 14 carbon atoms or an anteisoalkyl group having from 8 to 14 carbon atoms).

6. The oil-in-water emulsified composition according to the
 20 above item 5, wherein X is residue of leucine, isoleucine or valine.

7. The oil-in-water emulsified composition according to the above item 4, wherein the salt is at least one compound selected from the group consisting of sodium salt, potassium salt,
 25 monoethanolamine salt, diethanolamine salt, triethanolamine salt, arginine salt and lysine salt.

8. The oil-in-water emulsified composition according to the above item 4, wherein the microorganism-derived lipopeptide compound (A) is sodium surfactin.

9. The oil-in-water emulsified composition according to any one of the above items 1 to 8, comprising no nonionic surfactant.

10. The oil-in-water emulsified composition according to any one of the above items 1 to 9, comprising no acrylic acid-based water-soluble polymer.

11. An external preparation for skin comprising the oil-in-water emulsified composition according to any one of the above items 1 to 10.

12. A cosmetic comprising the oil-in-water emulsified composition according to any one of the above items 1 to 10.

The invention is explained below in detail.

Examples of the lipopeptide compound (A) used in the invention include lipopeptide compounds produced by microorganisms of genus *Bacillus* such as *Bacillus subtilis* described in JP-A-2000-327591 (WO99/62482). Preferable examples include salts of surfactin and salts of analogous compounds thereof.

The surfactin herein refers to a compound represented by the formula (1):

or a composition containing two or more kinds of the compounds represented by the formula (1).

In the above formula (1), X represents an amino acid residue selected from the group consisting of leucine, isoleucine,

valine, glycine, serine, alanine, threonine, asparagine, glutamine, aspartic acid, glutamic acid, lysine, arginine, cysteine, methionine, phenylalanine, tyrosine, tryptophan, histidine, proline, 4-hydroxyproline and homoserine.

5 Preferred X is leucine residue, isoleucine residue or valine residue.

R is a normal alkyl group having 8 to 14 carbon atoms, an isoalkyl group having 8 to 14 carbon atoms or an anteiso-alkyl group having 8 to 14 carbon atoms. The normal alkyl group is
10 a straight chain alkyl group; the isoalkyl group usually has a structure which comprises $(\text{CH}_3)_2\text{CH}-(\text{CH}_2)_n-$; and the anteiso-isoalkyl group usually has a structure which comprises $\text{CH}_3-\text{CH}_2-\text{CH}(\text{CH}_3)-(\text{CH}_2)_n-$.

The analogous compound of surfactin refers to compounds
15 having amino acid(s) substituted by other amino acid (s) in the aforementioned formula (1). Specifically, examples of such a compound include compounds where L-leucine as the second amino acid, L-valine as the fourth amino acid and/or D-leucine as the sixth amino acid are substituted by other amino acid(s),
20 but not limited thereto. Hereinafter, "surfactin or an analogous compound thereof" may be referred to as "surfactin".

Surfactin can be utilized as the inorganic salt or the organic salt of a compound as represented by the above formula (1). Metal used for counter ion may be of any kind, for example,
25 alkali metals such as sodium, potassium and lithium and alkaline earth metals such as calcium and magnesium, as long as the metal forms a salt with surfactin.

Examples of the organic salt include salts of trimethylamine, triethylamine, tributylamine,
30 monoethanolamine, diethanolamine, triethanolamine, lysine, arginine and choline.

Among these, salts of sodium, potassium, monoethanolamine, diethanolamine, triethanolamine, lysine and arginine are preferred, and sodium salt is particularly preferred.

As sodium surfactin, it is preferred to use a product
5 available on the market under the trade name of Aminofect (registered trademark of SHOWA DENKO K.K.).

The amount of lipopeptide compound contained in the composition of the present invention is preferably 0.1 to 5 % by mass, more preferably 0.5 to 4 % by mass, and still more
10 preferably 0.8 to 3 % by mass. When the amount is less than 0.1 % by mass, the stability of the composition may be insufficient, and also in cases where the compound is used in an amount exceeding 5 % by mass, it does not lead to increase in effects which is commensurate with the excess amount used
15 can be obtained.

External preparations for skin and cosmetics using microorganism-derived lipopeptide compounds are disclosed, for example, in JP-A-2000-327591 (W099/62482), JP-A-2003-176211 (W003/013446), JP-A-2003-95853,
20 JP-A-2003-12445, JP-A-2003-277220 and JP-A-2003-277250 mentioned in the "background art" paragraph. However, none of the documents describes that by using a microorganism-derived lipopeptide compound in combination with xanthan gum, good emulsification property can be obtained without using synthetic
25 water-soluble polymer or nonionic surfactant, and that thereby an oil-in-water emulsified composition excellent in feeling upon use, moisture retention, emollient property and stability as well as environmental suitability and safety for living organisms can be obtained. The present invention is the first
30 to disclose the technique.

The xanthan gum (B) used in the present invention is not

particularly limited and any kind can be used as long as the xanthan gum is generally used as raw material for external preparation for skin. Preferable examples of the xanthan gum usable in the present invention include Echo Gum, Echo Gum T and Echo Gum BT distributed by DAINIPPON PHARMACEUTICAL CO., LTD. The compounding amount of the xanthan gum in the composition of the present invention is preferably 0.05 to 1.5 % by mass, more preferably 0.08 to 0.7 % by mass, still more preferably 0.1 to 0.4 % by mass. If the amount of the xanthan gum is less than 0.05 % by mass, sufficient stability of the emulsified composition cannot be obtained. The amount of the xanthan gum exceeding 1.5 % by mass is unpreferable, since it would deteriorate feeling upon using the composition of the present invention.

The oil-in-water emulsified composition of the present invention contains oil component (C). Any oil material can be employed unless it is arbitrarily mixed with water. It is preferable that one or more selected from hydrocarbons, natural fats and oils, fatty acids, higher alcohols, alkyl glyceryl ethers, esters and silicone oils be compounded in. The total compounding amount of oil components is preferably 25 to 70 % by mass, more preferably 30 to 60 % by mass, based on the total amount of the composition.

The oil-in-water emulsified composition of the present invention contains water (D). The water content is to be contained as balance, and a preferable range of the water content is from 15 to 55 % by mass, and particularly preferred is from 20 to 50 % by mass.

The oil-in-water emulsified composition of the present invention does not necessarily require use of nonionic surfactants or acrylic acid-base water-soluble polymers which

are usually employed in production of conventional oil-in-water emulsified compositions and the composition of the present invention substantially does not have to contain such components. That is, preparation of the oil-in-water emulsified composition of the present invention may include addition of nonionic surfactants or acrylic acid base water-soluble polymers or may dispense with such components.

Examples of nonionic surfactant referred to herein include sorbitan fatty acid ester, polyoxyethylene sorbitan fatty acid ester, polyoxyethylene alkyl ether, glycerine fatty acid ester and polyoxyethylene glycerine fatty acid ester.

To be more specific, nonionic surfactants such as polyoxyethylene (10) alkyl (12,13) ether, polyoxyethylene lauryl ether, polyoxyethylene cetyl ether, polyoxyethylene stearyl ether, polyoxyethylene oleyl ether, polyoxyethylene (3,7,12) alkyl (12 to 14) ether, polyoxyethylene tridecyl ether, polyoxyethylene myristyl ether, polyoxyethylene-sec-alkyl (14) ether, polyoxyethylene isocetyl ether, polyoxyethylene cetostearyl ether, polyoxyethylene (2,10,20) isostearyl ether, polyoxyethylene oleylcetyl ether, polyoxyethylene (20) arachyl ether, polyoxyethylene octyldodecyl ether, polyoxyethylene behenyl ether, polyoxyethylene octylphenyl ether, polyoxyethylene nonylphenyl ether, polyoxyethylene dinonylphenyl ether, polyoxyethylene (1) polyoxypropylene (1,2,4,8) cetyl ether, polyoxyethylene (5) polyoxypropylene (1,2,4,8) cetyl ether, polyoxyethylene (10) polyoxypropylene (1,2,4,8) cetyl ether, polyoxyethylene (20) polyoxypropylene (1,2,4,8) cetyl ether, polyoxyethylene polyoxypropylene lauryl ether, polyoxyethylene (3) polyoxypropylene (34) stearyl ether, polyoxyethylene (4) polyoxypropylene (30) stearyl ether,

Further, examples of the acrylic acid base water-soluble
polymer include sodium polyacrylate, carboxyvinyl polymer,
alkyl-modified carboxyvinyl polymer, acrylate/methacrylate
25 copolymer, ethylene/acrylic acid copolymer,
acrylate/methacrylate alkyl (C 10 to 30) copolymer, acrylic
acid based anion polymer and methacrylic acid based anion
polymer.

In the emulsified composition of the present invention,
30 other ingredients which are usually used in conventional
external preparations for skin and cosmetics may be optionally

compounded in within a range where the present invention can attain the objects of the invention.

Examples of such ingredients include hydrocarbons such as ozokerite, α -olefin oligomer, light isoparaffin, light
5 liquid isoparaffin, squalene, squalane, synthetic squalane, phytosqualane, ceresin, paraffin, polyethylene powder, polybutene, microcrystalline wax, liquid isoparaffin, liquid paraffin, mineral oil and vaseline;

natural waxes such as jojoba oil, carnauba wax, candelilla
10 wax, rice bran wax, shellac, lanolin, mink sebaceous wax, spermaceti wax, sugarcane wax, sperm whale oil, beeswax and montan wax, natural fats and fatty oils such as avocado oil, almond oil, olive oil, extra virgin olive oil, sesame seed oil, rice bran oil, rice oil, rice germ oil, corn oil, safflower
15 oil, soybean oil, maize oil, rape seed oil, persic oil, palm kernel oil, palm oil, castor oil, sunflower oil, high oleic sunflower oil, grape seed oil, cotton seed oil, coconut oil, hydrogenated coconut oil, beef tallow, hydrogenated oil, horse oil, mink oil, yolk oil, yolk fat oil, rose hip oil, kukui nut
20 oil, evening primrose oil, wheat germ oil, peanut oil, Camellia japonica oil, Camellia kissi oil, cacao butter, Japan wax, beef bone tallow, nest's-foot oil, swine tallow, equine tallow, ovine tallow, shea butter, macadamia nut oil and meadowfoam seed oil;

fatty acids such as lauric acid, myristic acid, palmitic
25 acid, stearic acid, behenic acid, oleic acid, linoleic acid, linolenic acid, γ -linolenic acid, isostearic acid, 12-hydroxystearic acid, undecylenic acid and coconut oil fatty acid;

higher alcohols such as isostearyl alcohol, octyl
30 dodecanol, hexyl decanol, cholesterol, phytosterol, lauryl alcohol, myristyl alcohol, cetyl alcohol, stearyl alcohol,

oleyl alcohol, behenyl alcohol and cetostearyl alcohol;

alkylglyceryl ethers such as batyl alcohol, chimyl alcohol, serachyl alcohol and isostearyl glyceryl ether;

esters such as isopropyl myristate, butyl myristate,

5 isopropyl palmitate, ethyl stearate, butyl stearate, ethyl oleate, ethyl linoleate, isopropyl linoleate, cetyl caprylate, hexyl laurate, isooctyl myristate, decyl myristate, myristyl myristate, cetyl myristate, octadecyl myristate, cetyl palmitate, stearyl stearate, decyl oleate, oleyl oleate, cetyl
10 ricinoleate, isostearyl laurate, isotridecyl myristate, isocetyl myristate, isostearyl myristate, octyldodecyl myristate, 2-ethylhexyl palmitate, isocetyl palmitate, isostearyl palmitate, 2-ethylhexyl stearate, isocetyl stearate, isodecyl oleate, octyldodecyl oleate, octyldodecyl ricinoleate,
15 ethyl isostearate, isopropyl isostearate, cetyl 2-ethylhexanoate, cetostearyl 2-ethylhexanoate, stearyl 2-ethylhexanoate, hexyl isostearate, ethylene glycol dioctanoate, ethylene glycol dioleate, propylene glycol dicaprylate, propylene glycol dicaprylate/dicaprate,
20 propylene glycol dicaprate, propylene glycol dioleate, neopentyl glycol dicaprate, neopentyl glycol dioctanoate, glyceryl tricaprylate, glyceryl tri 2-ethyl hexanoate, glyceryl tricaprylate/tricaprate, glyceryl tricaprylate/tricaprate/tristearate, glyceryl triundecylate,
25 glyceryl triisopalmitate, glyceryl triisostearate, trimethylolpropane tri 2-ethylhexanoate, trimethylolpropane triisostearate, pentaerythrityl tetra 2-ethylhexanoate, pentaerythrityl tetramyristate, pentaerythrityl tetraisostearate, diglyceryl tetraisostearate, octyldodecyl
30 neopentanotae, isocetyl octanoate, isostearyl octanoate, 2-ethylhexyl isopelargonate, hexyldecyl dimethyloctanoate,

octyldodecyl dimethyloctanoate, 2-ethylhexyl isopalmitate,
isocetyl isostearate, isostearyl isostearate, octyldodecyl
isostearate, lauryl lactate, myristyl lactate, cetyl lactate,
octyldodecyl lactate, triethyl citrate, acetyltriethyl citrate,
5 acetyltributyl citrate, trioctyl citrate, triisocetyl citrate,
trioctyldodecyl citrate, diisostearyl malate, 2-ethylhexyl
hydroxystearate, di 2-ethylhexyl succinate, diisopropyl
adipate, diisobutyl adipate, dioctyl adipate, diheptylundecyl
adipate, sebacate diethyl, diisopropyl sebacate, dioctyl
10 sebacate, cholesteryl stearate, cholesteryl isostearate,
cholesteryl hydroxystearate, cholesteryl oleate,
dihydrocholesteryl oleate, phytosteryl isostearate,
phytosteryl oleate, isocetyl 12-stearoyl hydroxystearate,
stearyl 12-stearoyl hydroxystearate, isostearyl 12-stearoyl
15 hydroxystearate, polyoxyethylene (3) polyoxypropylene (1)
cetyl ether acetate, polyoxyethylene (3) polyoxypropylene (1)
isocetyl ether acetate, isononyl isononanoate, octyl
isononanoate, tridecyl isononanoate and isotridecyl
isononanoate;

20 silicone oils such as methyl polysiloxane, methylphenyl
polysiloxane, methyl hydrogen polysiloxane, methyl
cyclopolysiloxane, octamethyl cyclotetrasiloxane, decamethyl
cyclopentasiloxane, dodecamethyl cyclohexasiloxane,
octamethyl trisiloxane, decamethyl tetrasiloxane,
25 tetradecamethyl hexasiloxane, highly polymerized methyl
polysiloxane,
dimethylsiloxane-methyl (polyoxyethylene) siloxane-methyl (po
lyoxypropylene) siloxane copolymer,
dimethylsiloxane-methyl (polyoxyethylene) siloxane copolymer,
30 dimethylsiloxane-methyl (polyoxypropylene) siloxane copolymer,
dimethylsiloxane-methylcetyl oxysiloxane copolymer,

dimethylsiloxane-methyl stearoxysiloxane copolymer,
polyether modified silicone, alcohol modified silicone, alkyl
modified silicone and amino modified silicone;

polyhydric alcohols such as ethylene glycol, diethylene
5 glycol, triethylene glycol, polyethylene glycol, propylene
glycol, dipropylene glycol, polypropylene glycol, glycerin,
diglycerin, polyglycerin, 3-methyl-1,3-butanediol,
1,3-butanediol, 1,2-pentanediol and 1,2-hexanediol;

saccharides such as mannitol, sorbitol, xylitol, maltitol,
10 erythritol, pentaerythritol, glucose, sucrose, fructose,
lactose, maltose, xylose and trehalose;

polymers such as sodium alginate, carrageenan, agar,
furcellaran, guar gum and quince seed, Amorphophalus konjak
(arum root) mannan, tamarind gum, tara gum, dextrin, starch,
15 locust bean gum, gum arabic, gum gatti, karaya gum, gum
tragacanth, arabinogalactan, pectin, quince, chitosan, curdlan,
xanthan gum, gellan gum, cyclodextrin, dextran, pullulan,
microcrystalline cellulose, methyl cellulose, ethyl cellulose,
hydroxyethyl cellulose, hydroxypropyl cellulose,
20 hydroxypropylmethyl cellulose, carboxymethyl cellulose,
carboxy starch, cationized cellulose, starch phosphate ester,
cationized guar gum, carboxymethyl-hydroxypropylated guar gum,
hydroxypropylated guar gum, albumin, casein, gelatin,
polyacrylic amide, polyethylene imine, highly polymerized
25 polyethylene glycol, polyvinyl alcohol, polyvinyl pyrrolidone,
polyvinyl ether, polyacryl amide, acrylic acid copolymer,
methacrylic acid copolymer, maleic acid copolymer,
vinylpyridine copolymer, vinyl pyrrolidone based polymer,
vinyl alcohol/vinyl pyrrolidone copolymer,
30 nitrogen-substituted acrylamide based polymer, amino modified
silicone, cationized polymer, dimethylacryl ammonium based

polymer, modified silicone and
polyoxyethylene/polyoxypropylene copolymer;

alcohols such as ethanol, isopropyl alcohol, 1-butanol,
2-butanol and benzyl alcohol;

5 anionic surfactants such as coconut oil fatty acid
potassium, coconut oil fatty acid sodium, coconut oil fatty
acid triethanolamine, potassium laurate, sodium laurate,
triethanolamine laurate, potassium myristate, sodium myristate,

sarcosine triethanolamine, oleoyl sarcosine, sodium myristoyl
25 sarcosine, sodium stearoyl glutamate, coconut oil fatty acid
acyl glutamic acid, potassium coconut oil fatty acid acyl
glutamate, sodium coconut oil fatty acid acyl glutamate, coconut
oil fatty acid acyl glutamate triethanolamine, lauroyl acyl
glutamic acid, potassium lauroyl acyl glutamate, sodium
30 lauroyl acyl glutamate, lauroyl acyl glutamate triethanolamine,
myristoyl acyl glutamic acid, potassium myristoyl acyl glutamate,

sodium myristoylacyl glutamate, stearylacyl glutamic acid,
potassium stearylacyl glutamate, disodium stearylacyl
glutamate, sodium hydrogenated beef tallow fatty acid acyl
glutamate, sodium coconut oil fatty acid/hydrogenated beef
5 tallow fatty acid acyl glutamate, sodium coconut oil fatty acid
methylalanine, lauroyl methylalanine, sodium lauroyl
methylalanine, lauroyl methylalanine triethanolamine, sodium
myristoyl methylalanine, sodium lauroyl methyltaurine,
potassium coconut oil fatty acid methyltaurine, sodium coconut
10 oil fatty acid methyltaurine, magnesium coconut oil fatty acid
methyltaurine, sodium myristoyl methyltaurine, sodium
palmitoyl methyltaurine, sodium stearyl methyltaurine, sodium
oleoyl methyltaurine, sodium alkane sulfonate, sodium
tetradecene sulfonate, sodium sulfosuccinate dioctyl, disodium
15 lauryl sulfosuccinate, sodium coconut oil fatty acid ethyl ester
sulfonate, sodium lauryl sulfate, triethanolamine lauryl
sulfate, sodium cetyl sulfate, triethanolamine alkyl
(11,13,15) sulfate, sodium alkyl (12,13) sulfate,
triethanolamine alkyl (12,13) sulfate, alkyl (12,14,16)
20 ammonium sulfate, diethanolamine alkyl (12 to 13) sulfate,
triethanolamine alkyl (12 to 14) sulfate, triethanolamine alkyl
(12 to 15) sulfate, magnesium coconut oil alkyl
sulfate/triethanolamine, lauryl ammonium sulfate, potassium
lauryl sulfate, magnesium lauryl sulfate, monoethanolamine
25 lauryl sulfate, diethanolamine lauryl sulfate, sodium myristyl
sulfate, sodium stearyl sulfate, sodium oleyl sulfate,
triethanolamine oleyl sulfate, sodium polyoxyethylene lauryl
ether sulfate, triethanolamine polyoxyethylene lauryl ether
sulfate, sodium polyoxyethylene (1) alkyl (11,13,15) ether
30 sulfate, triethanolamine polyoxyethylene (1) alkyl (11,13,15)
ether sulfate, sodium polyoxyethylene (3) alkyl (11 to 15) ether

sulfate, sodiumpolyoxyethylene (2) alkyl (12,13) ether sulfate, sodiumpolyoxyethylene (3) alkyl (12 to 14) ether sulfate, sodiumpolyoxyethylene (3) alkyl (12 to 15) ether sulfate, sodiumpolyoxyethylene (2) lauryl ether sulfate, sodiumpolyoxyethylene (3) myristyl ether sulfate, sodium higher fatty acid alkanol amide sulfate ester, lauryl phosphate, sodium lauryl phosphate, potassium cetyl phosphate, diethanolamine cetyl phosphate, polyoxyethylene oleyl ether phosphate, polyoxyethylene lauryl ether phosphate, sodiumpolyoxyethylene lauryl ether phosphate, polyoxyethylene cetyl ether phosphate, sodiumpolyoxyethylene cetyl ether phosphate, polyoxyethylene stearyl ether phosphate, polyoxyethylene oleyl ether phosphate, sodiumpolyoxyethylene oleyl ether phosphate, polyoxyethylene alkylphenyl ether phosphate, sodium polyoxyethylene alkylphenyl ether phosphate, triethanolamine polyoxyethylene alkylphenyl ether phosphate, polyoxyethylene octyl ether phosphate, polyoxyethylene (10) alkyl (12,13) ether phosphate, polyoxyethylene alkyl (12 to 15) ether phosphate, polyoxyethylene alkyl (12 to 16) ether phosphate, triethanolamine polyoxyethylene lauryl ether phosphate and diethanolamine polyoxyethylene oleyl ether phosphate;

cationic surfactants such as dioctylamine, dimethylstearylamine, trilaurylamine, diethylaminoethylamide stearate, lauryl trimethylammonium chloride, cetyl trimethylammonium chloride, cetyl trimethylammonium bromide, cetyl trimethylammonium saccharin, stearyl trimethylammonium chloride, alkyl (20 to 22) trimethylammonium chloride, lauryl trimethylammonium bromide, alkyl (16,18) trimethylammonium chloride, stearyl trimethylammonium bromide, stearyl trimethylammonium saccharin, alkyl (28) trimethylammonium chloride,

di(polyoxyethylene) oleyl methylammonium (2EO) chloride,
dipolyoxyethylene stearyl methylammonium chloride,
polyoxyethylene (1) polyoxypropylene (25)
diethylmethylammonium chloride, tri(polyoxyethylene) stearyl
5 ammonium (5EO) chloride, distearyl dimethylammonium chloride,
dialkyl (12 to 15) dimethylammonium chloride, dialkyl (12 to
18) dimethylammonium chloride, dialkyl (14 to 18)
dimethylammonium chloride, dicocoyl dimethylammonium chloride,
dicetyl dimethylammonium chloride, isostearyl lauryl
10 dimethylammonium chloride, benzalkonium chloride, myristyl
dimethylbenzyl ammonium chloride, lauryl
dimethyl(ethylbenzyl) ammonium chloride, stearyl
dimethylbenzyl ammonium chloride, lauryl pyridinium chloride,
cetyl pyridinium chloride, lauroyl cholamino formylmethyl
15 pyridinium chloride, stearoyl cholamino formylmethyl
pyridinium chloride, alkyl isoquinolinium bromide, methyl
benzethonium chloride and benzethonium chloride;

ampholytic surfactants such as

2-alkyl-N-carboxymethyl-N-hydroxyethyl imidazolium betaine,
20 alkyl diamino ethyl glycine hydrochloride, sodium lauryl diamino
ethyl glycine, sodium undecyl hydroxyethyl imidazolium betaine,
undecyl-N-carboxymethyl imidazolium betaine, disodium coconut
oil fatty acid acyl-N-carboxyethyl-N-hydroxyethyl
ethylenediamine, disodium coconut oil fatty acid
25 acyl-N-carboxyethoxyethyl-N-carboxyethyl ethylenediamine,
disodium coconut oil fatty acid
acyl-N-carboxymethoxyethyl-N-carboxymethyl ethylenediamine,
sodium lauryl amino propionate, sodium lauryl amino dipropionate,
triethanolamine lauryl amino propionate, sodium palm oil fatty
30 acid acyl-N-carboxyethyl-N-hydroxyethyl ethylenediamine,
betaine lauryl dimethylamino acetate, betaine coconut oil

alkyldimethylamino acetate, betaine stearyl dimethylamino acetate, sodium stearyldimethyl betaine, coconut oil fatty acid amidopropyl betaine, palm oil fatty acid amidopropyl betaine, amidopropyl acetate betaine laurate, amidopropyl betaine
5 ricinoleate, stearyl dihydroxyethyl betaine and lauryl hydroxysulfobetaine;

natural surfactants such as saponin, lecithin, soybean phospholipid, hydrogenated soybean phospholipid, soybean lysophospholipid, hydrogenated soybean lysophospholipid, yolk
10 lecithin, hydrogenated yolk lysophosphatidylcholine, phosphatidylcholine, phosphatidylethanolamine, phosphatidylserine, sphingophospholipid, sphingomyelin, ganglioside, bile acid, cholic acid, deoxycholic acid, sodium cholate, sodium deoxycholate, spiculisporic acid, rhamnolipid,
15 trehalose lipid, sophorolipid and mannosyl erythritol lipid;

ultraviolet ray absorbers such as: para-aminobenzoic acid derivatives such as para-aminobenzoic acid, ethyl para-aminobenzoate, glyceryl para-aminobenzoate, amyl para-dimethyl aminobenzoate and 2-ethylhexyl para-dimethyl
20 aminobenzoate; cinnamic acid derivatives such as benzyl cinnamate, mono-2-ethyl hexanoate glyceryl dipara-methoxycinnamate, methyl 2,4-diisopropyl cinnamate, ethyl 2,4-diisopropyl cinnamate, potassium para-methoxycinnamate, sodium para-methoxycinnamate,
25 isopropyl para-methoxycinnamate, 2-ethylhexyl para-methoxycinnamate, 2-ethoxyethyl para-methoxycinnamate and ethyl para-ethoxycinnamate; urocanic acid derivatives such as urocanic acid and ethyl urocanate; benzophenone derivatives such as 2,4-dihydroxybenzophenone,
30 2,2',4,4'-tetrahydroxybenzophenone, sodium 2-hydroxy-4-methoxy-5-sulfobenzophenone,

2-hydroxy-4-methoxybenzophenone-5-sulfonate,
2-hydroxy-4-methoxybenzophenone,
2,2'-dihydroxy-4,4'-dimethoxybenzophenone and sodium
2,2'-dihydroxy-4,4'-dimethoxy-5-sulfobenzophenone;

5 salicylic acid derivatives such as ethylene glycol salicylate,
salicylate-2-ethylhexyl, phenyl salicylate, benzyl salicylate,
p-tert-butylphenyl salicylate, homomenthyl salicylate and
salicylate-3,3,5-trimethylcyclohexyl;
2-(2'-hydroxy-5'-methoxyphenyl)benzotriazole and
10 4-tert-butyl-4'-methoxybenzoyl methane;

powders and color materials such as: kaolin, silicic
anhydride, magnesium aluminum silicate, sericite, talc, boron
nitride, mica, montmorillonite, hemp cellulose powder, wheat
starch, silk powder, maize starch; natural dyes such as nitro
15 dyes, azo dyes, nitroso dyes, triphenylmethane dyes, xanthene
dyes, quinoline dyes, anthraquinone dyes, indigo dyes, pyrene
dyes, phthalocyanine dyes, flavonoid, quinone, porphyrin,
water soluble annatto, sepia powder, caramel, guaiazulene,
gardenia blue, gardenia yellow, cochineal, shikonin, sodium
20 copper chlorophyllin, paprika dye, safflower red, safflower
yellow, laccaic acid and riboflavin butyrate ester; carbon black,
yellow iron oxide, black iron oxide, red iron oxide, iron blue,
ultramarine blue, zinc oxide, chromium oxide, titanium oxide,
black titanium oxide, zirconium oxide, chromium hydroxide,
25 alumina, magnesium oxide, barium sulfate, aluminum hydroxide,
calcium carbonate, lithium cobalt titanate, manganese violet
and pearl pigment.

plant extracts such as Angelica keiskei extract, Uncaria
gambir extract, avocado extract, sweet hydrangea leaf extract,
30 Gynostemma pentaphyllum makino extract, Althaea officinalis
extract, Arnica montana extract, oil soluble Arnica montana

extract, almond extract, aloe extract, Japanese styrax benzoin
extract, Ginkgo biloba extract, Stinging nettle extract, Orris
rhizome root extract, fennel extract, turmeric extract, dog
rose fruit extract, Echinacea leaf extract, Scutellaria root
5 extract, Phellodendron bark extract, Japanese captis extract,
barley extract, okra extract, Hypericum perforatum extract,
oil soluble Hypericum perforatum extract, Lamium album extract,
oil soluble Lamium album extract, Ononis spinosa root extract,
Nasturtium officinale extract, orange extract, orange flower
10 water, seaweed extract, persimmon tannin, pueraria root extract,
Japanese valerian extract, cattail extract,
Chamomile (matricaria) extract, oil soluble Chamomile
(matricaria) extract, Chamomile (matricaria) distillate, Avena
sativa (oat) kernel extract, carrot extract, oil soluble carrot
15 extract, carrot oil, Artemisia capillaris extract, Glycyrrhiza
glabra (licorice) extract, powdered Glycyrrhiza glabra
(licorice) extract, Glycyrrhiza glabra (licorice) extract
flavonoid, cantharides tincture, raspberry extract, kiwi
extract, cinchona extract, cucumber extract, apricot kernel
20 extract, quince seed extract, gardenia florida extract, Sasa
albomarginata extract, Sophora root extract, walnut shell
extract, Citrus paradisi (grapefruit) extract, Clematis
vitalba leaf extract, black sugar extract, chlorella extract,
mulberry bark extract, Cinnamon bark extract, Gentian extract,
25 Geranium herb extract, black tea extract, Nuphar extract,
burdock root extract, oil soluble burdock root extract, wheat
germ extract, hydrolyzed wheat powder, rice bran extract,
fermented rice bran extract, Symphytum officinale (comfrey)
extract, Asiasarum root extract, Crocus sativus (saffron)
30 extract, Saponaria officinalis extract, oil soluble salvia
extract, Crataegus cuneata fruit extract, Zanthoxylum fruit

extract, *Lentinus edodes* extract, powdered *Lentinus edodes* extract, *Rehmannia* root extract, *Lithospermum* root extract, oil soluble *Lithospermum* root extract, *Perilla* herb extract, linden extract, oil soluble *Tilia europaea* extract, *Filipendula*
5 extract, *Peony* root extract, *Coix lacryma-jobi* extract, ginger extract, oil soluble ginger extract, ginger tincture, *Acorus calamus* root extract, *Betula pendula* (birch) extract, oil soluble *Betula alba* (birch) extract, *Betula pendula* (birch) sap, *Lonicera japonica* extract, *Equisetum arvense* extract, oil
10 soluble *Equisetum arvense* extract, scordinin, *stevia* extract, ivy extract, *Crataegus oxyacantha* (whitethorn) extract, *sambucus* extract, *Juniperus communis* extract, *Achillea millefolium* extract, oil soluble *Achillea millefolium* extract, *Mentha piperita* (peppermint) extract, *Salvia officinalis*
15 (sage) extract, oil soluble *Salvia officinalis* (sage) extract, *Salvia officinalis* (sage) water, *Malva Sylvestris* (mallow) extract, *Apium graveolens* (celery) extract, *Cnidium officinale* extract, *Cnidium officinale* water, *Swertia* herb extract, *Glycine max* (soybean) extract, *Jujube* extract, thyme extract,
20 green tea extract, tea leaf dry distilled solution, tea seed extract, clove extract, *Citrus unshiu* peel extract, *Camellia japonica* extract, *Centella asiatica* extract, oil soluble walnut extract, duku extract, *Terminalia sericea* extract, *Capsicum* tincture, Japanese angelica root extract, oil soluble Japanese
25 angelica root extract, Japanese angelica root water, *Calendula officinalis* flower extract, oil soluble *Calendula officinalis* flower extract, soy milk powder, peach seed extract, Bitter orange peel extract, *Houttuynia cordata* extract, *Solanum lycopersicum* (tomato) extract, *Potentilla tormentilla* Schrk
30 (Rosaceae) extract, fermented soybeans extract, Ginseng extract, oil soluble Ginseng extract, *Allium sativum* (garlic)

extract, wild rose extract, oil soluble wild rose extract, malt
extract, malt root extract, Ophiopogon tuber extract, parsley
extract, rye leaf juice concentrate, peppermint distillate,
witch hazel distillate, witch hazel extract, rose extract,
5 parietaria extract, Isodonis japonicus extract, Eriobotrya
japonica leaf extract, oil soluble Eriobotrya japonica leaf
extract, coltsfoot extract, hoelen extract, Ruscus aculeatus
root extract, powdered Ruscus aculeatus root extract, grape
extract, grape leaf extract, grape water, Hayflower extract,
10 Luffa cylindrica fruit extract, Luffa cylindrica fruit water,
Carthamus tinctorius (safflower) extract, oil soluble Tilia
platyphyllos extract, linden distillate, Paeonia suffruticosa
(peony) extract, Humulus lupulus (hops) extract, oil soluble
Humulus lupulus (hops) extract, pine extract, Silybum marianum
15 (milk thistle) extract, Aesculus hippocastanum (horse
chestnut) extract, oil soluble Aesculus hippocastanum (horse
chestnut) extract, Sapindus mukurossi extract, Melissa
officinalis (balm mint) extract, Melilotus officinalis
(melilot) extract, Prunus persica (peach) leaf extract, oil
20 soluble Prunus persica (peach) leaf extract, bean sprouts
extract, Centaurea cyanus flower extract, Centaurea cyanus
flower distillate, Eucalyptus globulus extract, Saxifrage
extract, Lilium (lily) extract, Coix seed extract, oil soluble
Coix seed extract, Artemisia princeps pampanini extract,
25 Artemisia princeps pampanini water, Lavandula angustifolia
(lavender) extract, Lavandula angustifolia (lavender) water,
apple extract, Ganoderma lucidum extract, Lactuca sativa
(lettuce) extract, lemon extract, Astragalus sinicus extract,
Rosa centifolia (rose) flower water, Rosemarinus officinalis
30 (rosemary) extract, oil soluble Rosemarinus officinalis
(rosemary) extract, Anthemis nobilis extract and Sanguisorba

officinalis extract;

amino acids and peptides such as glycine, alanine, valine, leucine, isoleucine, serine, threonine, phenylalanine, tyrosine, tryptophan, cystine, cysteine, methionine, proline, hydroxyproline, aspartic acid, asparagine, glutamic acid, glutamine, arginine, histidine, lysine, γ -aminobutyric acid, DL-pyrrolidonecarboxylic acid, ϵ -aminocaproic acid, hydrolyzed elastin, water soluble elastin, hydrolyzed collagen, water soluble collagen, casein, glutathione, wheat peptides and soybean peptide;

vitamins and factors acting like a vitamin such as: vitamin A and analogues thereof such as retinol, retinal, retinoic acid, retinol acetate and retinol palmitate; Carotenoids such as α -carotene, β -carotene, γ -carotene, δ -carotene, lycopene, zeaxanthin, cryptoxanthin, echinenon and astaxanthin; vitamin B₁ and analogues thereof such as thiamines; vitamin B₂ and analogues thereof such as riboflavin; vitamin B₆ and analogues thereof such as pyridoxine, pyridoxal and pyridoxamine; vitamin B₁₂ and analogues thereof such as cyanocobalamin; folic acids, nicotinic acid, nicotinamide, pantothenic acids, biotins; vitamin C and analogues thereof such as L-ascorbic acid, sodium L-ascorbate, L-ascorbyl stearate, L-ascorbyl palmitate, L-ascorbyl dipalmitate, L-ascorbyl tetraisoopalmitate, L-ascorbate sulfate disodium ester, magnesium L-ascorbyl, sodium L-ascorbyl phosphate and L-ascorbate-2-glucoside; vitamin D and analogues thereof such as ergocalciferol and cholecalciferol; vitamin E and analogues thereof such as d- α -tocopherol, DL- α -tocopherol, dl- α -tocopherol acetate, dl- α -tocopherol succinate, β -tocopherol, γ -tocopherol and d- δ -tocopherol; ubiquinones, vitamin K and analogues thereof, carnitine, ferulic acid, γ -oryzanol, α -lipoic acid and orotic

acid;

antiseptic agents such as benzoic acid, sodium benzoate, undecylenic acid, salicylic acid, sorbic acid, potassium sorbate, dehydroacetic acid, sodium dehydroacetate, isobutyl
5 parahydroxybenzoate, isopropyl parahydroxybenzoate, ethyl parahydroxybenzoate, butyl parahydroxybenzoate, propyl parahydroxybenzoate, benzyl parahydroxybenzoate, methyl parahydroxybenzoate, sodium parahydroxybenzoate methyl, phenoxyethanol, light sensitive dye No. 101, light sensitive
10 dye No. 201 and light sensitive dye No. 401;

antioxidizing agents such as butylhydroxyanisole, butylhydroxytoluene, propyl gallate, erythorbic acid, sodium erythorbate, para-hydroxyanisole and octyl gallate;

chelating agents to bind to a metal ion such as trisodium
15 ethylenediaminehydroxyethyl triacetate, edetic acid, disodium edetate, trisodium edetate, tetrasodium edetate, sodium citrate, gluconic acid, phytic acid, sodium polyphosphate and sodium metaphosphate;

moisturizing agents such as hyaluronic acid, sodium
20 hyaluronate, sodium chondroitin sulfate, sodium lactate, sodium pyrrolidone carboxylate, betaine, lactic acid bacteria fermented solution, yeast extract and ceramide;

anti-inflammatory agents such as glycyrrhizic acid, trisodium glycyrrhizinate, dipotassium glycyrrhizinate,
25 monoammonium glycyrrhizinate, β -glycyrrhetinic acid, glycerin glycyrrhetinate, stearyl glycyrrhetinate, lysozyme chloride, hydrocortisone and allantoin;

pH adjusting agents such as sodium hydroxide, potassium hydroxide and triethanolamine;

30 salts such as sodium chloride, potassium chloride, magnesium chloride and sodium sulfate;

α -hydroxy acids such as citric acid, glycolic acid, tartaric acid and lactic acid;

whitening agents such as arbutin, α -arbutin and placenta extract;

5 essential oils such as *Archangelica officinalis* (angelica) oil, *Canangium odoratum* (ylang ylang) oil, *Canarium luzonicum* (elemi) oil, orange oil, *Chamomilla recutita* (matricaria) oil, *Anthemis nobilis* oil, *Elettaria cardamom* (cardamon) oil, *Acorus calamus* (calamus) oil, *Ferula*
10 *galbaniflua* (galbanum) oil, *Cinnamomum camphora* (camphor) oil, *Daucus carota* (carrot) seed oil, *Salvia sclarea* (clary sage) oil, *Citrus paradisi* (grapefruit) oil, *Eugenia caryophyllus* (clove) oil, Cinnamon bark oil, *Coriandrum sativum* (coriander) oil, *Cupressus sempervirens* (cypress) oil, *Santalum album*
15 (sandalwood) oil, *Juniperus virginiana* (cedarwood) oil, *Cympogon nardus* (citronella) oil, *Cinnamomum zeylanicum* (Cinnamon) leaf oil, *Jasmine officinale* (jasmine) absolute oil, *Juniperus communis* (juniper Berry) oil, *Zingiber officinale* (ginger) extract, *Mentha spicata* (spearmint) oil, *Salvia*
20 *officinalis* (sage) oil, cedar oil, *Pelargonium graveolens* (geranium) oil, *Thymus vulgaris* (thyme) oil, *Melaleuca alternifolia* (tea tree) oil, *Myristica fragrans* (nutmeg) oil, *Melaleuca qu. viridiflora* (niaouli) oil, *Citrus aurantium* (neroli) oil, pine oil, *Ocimum basilicum* (basil) oil, *Mentha*
25 *arvensis* oil, *Pogostemon patchouli* (patchouli) oil, *Cymbopogon martini* (palmarosa) oil, *Foeniculum vulgare* (fennel) oil, *Citrus bigaradia* (petitgrain) oil, *Piper nigrum* (black pepper) oil, *Boswellia carterii* (frankincense) oil, *Vetiveria zizanoides* (vetiver) oil, *Mentha piperita* (peppermint) oil,
30 *Citrus bergamia* (bergamot) oil, benzoin oil, *Aniba rosaeodora* (bois de rose) oil, *Origanum majorana* (marjoram) oil, mandarin

oil, Conumiphora myrrha (myrrh) oil, Melissa officinalis (balm mint) oil, Eucalyptus globulus oil, Citrus junos oil, Citrus aurantifolia (lime) oil, Ravensara aromaticum (ravensara) oil, Lavandula latifolia (lavandin) oil, Lavandula angustifolia (lavender) oil, Tilia vulgaris (linden) oil, lemon oil, lemon grass oil, rose oil, Aniba rosaeodora (rosewood) oil, Rosemarinus officinalis (rosemary) oil and Levisticum officinale (lovage) oil;

terpenes such as limonene, pinene, terpinene, terpinolene, myrcene and longifeelene;

fragrance, and the like.

Furthermore, to the cosmetic of the invention may also be added any existing raw material of cosmetics at a general concentration. All raw materials of cosmetics described in, for example, Keshouhin genryou kizyun (Standards of raw materials of cosmetics), second edition, notes, edited by Society of Japanese Pharmacopoeia, 1984 (YAKUJI NIPPO LIMITED.), Keshouhin genryou kizyun-gai seibun kikaku (Standards of raw materials of cosmetics, nonstandard ingredients), under the editorship of Pharmaceutical Affairs Bureau Evaluation and Registration Division, 1993 (YAKUJI NIPPO LIMITED.), Keshouhin genryou kizyun-gai seibun kikaku tsuiho (Standards of raw materials of cosmetics, nonstandard ingredient Supplement), under the editorship of Pharmaceutical Affairs Bureau Evaluation and Registration Division, 1993 (YAKUJI NIPPO LIMITED.), Keshouhin syubetsu kyoka kizyun (Standards of cosmetic classification permission), under the editorship of Pharmaceutical Affairs Bureau Evaluation and Registration Division, 1993 (YAKUJI NIPPO LIMITED.), Keshouhin syubetsu haigou seibun kikaku (Standards of cosmetic classification ingredients), under the editorship of Pharmaceutical Affairs

Bureau Evaluation and Registration Division, 1997 (YAKUJI NIPPO LIMITED.), Keshouhingenryoujiten (Dictionary of raw materials of cosmetics), 1991 (Nikko Chemicals Co., Ltd.) and the like may be used.

5 The oil-in-water emulsified composition of the present invention can be prepared by a general emulsification method. That is, the composition can be prepared by using general-purpose stirrers or emulsifiers such as a colloid mill, a homomixer, a high-pressure homogenizer, an ultrasonic emulsifier and the
10 like.

 The oil-in-water emulsified composition of the invention thus obtained can be suitably used in external preparations for skin such as emulsion and cream and in cosmetics for basic skin care, makeup and body care such as milky lotion, essence,
15 skin cream, makeup base lotion, makeup base cream, milky-liquid type foundation, cream-type foundation, creamy eye color, creamy cheek color and pack.

BEST MODE FOR CARRYING OUT THE INVENTION

20 The present invention is explained in more detail below by way of Examples, however the invention is by no means limited to these Examples. In Examples demonstrated below, glycerin for use had a concentration of 98 mass% or more. Sodium surfactin for use was Aminofect (registered trademark) manufactured by
25 SHOWA DENKO K.K. What the mark "%" indicates is percentage by mass.

Examples 1 to 5 and Comparative Examples 1 to 4:

 Emulsified compositions each having a composition as
30 shown in Table 1 were prepared according to the preparation method described below. Using the compositions, storage

stability tests were conducted. In the tests, after leaving test samples to stand at 40°C for 8 weeks in a glass bottle, the condition and appearance were observed. Samples in which separation was observed were evaluated "x" while samples in
5 which no separation was found were evaluated as "O".

Table 1

composition		Ex.1	Ex.2	Ex.3	Ex.4	Ex.5	Comp. Ex.1	Comp. Ex.2	Comp. Ex.3	Comp. Ex.4

	propylparaben	0.05%	0.05%	0.05%	0.05%	0.05%	0.05%	0.05%	0.05%	0.05%
III	xanthan gum (2% aqueous solution)	10%	4%	8%	8%	10%	—	10%	0.5%	—
	storage stability	○	○	○	○	○	×	×	×	×

[Preparation method of cosmetic]

The components in (I) and the components in (II) were separately mixed and heated to 85°C. To the mixture of the components in (I), the mixture of the components in (II) was gradually added while stirring the mixed components (I) by a homomixer, and further, the components in (III) were added thereto, and the resultant mixture was further stirred. After cooling the mixture to 30°C while stirring, the stirring was stopped and the resultant mixture was left standing at room temperature.

[Results]

As is clear from Table 1, the emulsified compositions of the present invention (Examples 1 to 5) exhibited more excellent storage stability, in comparison with the emulsified compositions of Comparative Examples 1 to 4.

Example 6 and Comparative Example 5:

Emulsified compositions each having a composition as shown in Table 2 were prepared according to the preparation method described below. Using the compositions, storage stability tests as aforementioned were conducted.

Table 2

composition		Ex.6	Comp. Ex. 6
I	sodium surfactin	2%	2%
	glycerin	8%	8%
	purified water	balance	balance
II	squalane	9.65%	9.65%
	liquid paraffin	16%	16%

	dimethicone	8%	8%	8%
	xanthan gum	0.2%	0.2%	—
	methylparaben	0.1%	0.1%	0.1%
	propylparaben	0.05%	0.05%	0.05%
II	purified water	balance	balance	balance
	citric acid (10% aqueous solution)	0.2%	—	—
storage stability		○	○	×

[Method of preparation]

The components in (I) and the components in (II) were separately mixed and heated to 85°C. To the mixture of the components in (I), the mixture of the components in (II) was gradually added while stirring the mixed components (I) by

a homomixer. After cooling the mixture to 30°C while stirring, the stirring was stopped and the resultant mixture was left standing at room temperature.

[Results]

As is clear from Table 3, the emulsified compositions of the present invention (Examples 7 and 8) exhibited more excellent storage stability, in comparison with the emulsified composition of Comparative Example 6.

Example 9:moisturizing cream

A moisturizing cream having a composition as shown in Table 4 was prepared according to the preparation method described below and storage stability test as aforementioned was conducted.

Table 4

composition		Ex.9
I	sodium surfactin	2%
	glycerin	8%
	1,3-buthanediol	2%
	purified water	balance
II	squalane	9.65%
	liquid paraffin	16%
	isononyl isononanoate	8%
	glyceryl tri-2-ethylhexanoate	8%
	dimethicone	8%
	cetostearyl alcohol	8%
	methylparaben	0.1%
	propylparaben	0.05%
	xanthan gum (2% aqueous solution)	10%
	sodium hyaluronate (1% aqueous solution)	8%
	dipotassium glycyrrhizinate	0.2%
storage stability		○

[Method of preparation]

The components in (I) and the components in (II) were separately mixed and heated to 85°C. To the mixture of the components in (I), the mixture of the components in (II) was gradually added while stirring the components (I) by a homomixer. After cooling the mixture to 30°C while stirring, the stirring was stopped and the resultant mixture was left standing at room temperature.

[Results]

The obtained cream exhibited an excellent storage stability. Moreover, the cream had an excellent moisturizing action, was non-irritant and provided smooth feeling upon use.

Example 10: emollient lotion

An emollient lotion having a composition as shown in Table 5 was prepared according to the preparation method described below and storage stability test as aforementioned was conducted.

Table 5

composition		Ex.10
I	sodium surfactin	2%
	glycerin	8%
	1,3-buthanediol	2%
	purified water	balance
II	squalane	9.65%
	cetyl 2-ethylhexanoate	8%
	octyldodecyl myristate	8%
	isononyl isononanoate	8%
	glyceryl tri-2-ethylhexanoate	8%
	macadamia nut oil	4%
	cetostearyl alcohol	2%
	phytosterol	0.4%
	methylparaben	0.1%
	propylparaben	0.05%
	xanthan gum	0.2%
	sodium hyaluronate (1% aqueous solution)	8%
	storage stability	○

[Method of preparation]

The components in (I) and the components in (II) were separately mixed and heated to 85°C. To the mixture of the components in (I), the mixture of the components in (II) was gradually added while stirring the components (I) by a homomixer. After cooling the mixture to 30°C while stirring, the stirring was stopped and the resultant mixture was left standing at room temperature.

[Results]

The obtained lotion exhibited an excellent storage stability. Moreover, the lotion had an excellent emollient property, was non-irritant and provided smooth feeling upon use.

INDUSTRIAL APPLICABILITY

According to the present invention, an oil-in-water emulsified composition which is excellent in feeling upon use, moisture retention, emollient property and stability as well as environmental suitability and safety for living organisms.
